

Alejandro has his grandfather red drop top, after many
Years of hard work and getting into college

With all the students bringing their cars
Alejandro has Nowhere to park his car

He hears about a parking app from a peer who
had the same parking issue, the app tells him
When and where parking spaces are available

Alejandro downloads the app and immediately
finds hundreds of empty spaces across
campus even close to his dorm.

With him not having to worry about parking
Alejandro, can enjoy his car and not worry about
tickets for parking in illegal spaces

Alejandro shares this with his peers that have
the same issue allowing them to save money
from parking tickets from the school
